Free Dental Care – Oral Health

On February, the pro-family's mobile dental care truck came to visit our lodging houses, where dentists realized: dental consultations, tooth extractions, teeth cleaning, dental reviews, fluor applications and placement of resins, with the intention of supporting our worker's families in a completely free way. In this occasion 12 people from El Porvenir and 25 from Cafetal were benefited. Month after month more families are being attended, being our objective that they all have the chance to receive dental care. By preserving a good oral health it allows us to reduce the loss of teeth, making the process of chewing more effective, to enjoy more the flavor of foods, to improve personal appearance, health and general well being.

1000 Days of Nutrition Training Course

AFOMAC and our company coordinated a training course for parents (our collaborators), where they learned about the program “1000 days of nutrition”, addressing important topics based on children’s nutrition.

During the course of the day, children remain at our daycares where nutritious and balanced meals are provided to them according to their age. While in the evenings children go back home and here is when their parents must continue with the proper feeding of their children. This type of trainings are very helpful for parents because they get to know the importance and the benefits that brings to their children’s growing, physical and mental development when providing them with balanced and nutritious foods.
